## BTCC vs Gemini

Next, we will compare BTCC and Gemini based on factors such as supported cryptocurrencies, fees, security, customer service, service scope and ease of use. We believe this comparison is beneficial for traders who face difficulties in making choice for crypto trading.

	BTCC	BTCC vs. Gemini	Gemini
Supported Cryptocurrencies	360+		80+
Fees	Compared with other major crypto exchanges, the fees charged by BTCC is relative low, such as only charging 0.06% for both takers and makers		Gemini's fee structure may be too big a downside for those who are just getting started in crypto, although wire transfer deposits are free, any deposit from a debit card would generate a 3.49% fee; traders using the web or mobile app are required to pay a "convenience fee" of 0.5%
Security	Boast impressive security with no reported hacks or security breaches to date		Industry-leading security with security practices like two-factor authentication; investors should be reminded that in 2022, Gemini suffered from a breach of data and reportedly 5.7 million emails were leaked
Customer Service	Offer 24/7 excellent customer service via email and live chat		Customer support needs further improvement due to the lack of a customer service phone number and other significant customer service options
Service Scope	Offer service to more than 6 million registered users in more than 100 countries and regions		Be available in 60+ countries, including all 50 U.S. states
Ease of Use	Intuitive interface, easy for both newcomers and experienced traders		Provide a beginner-friendly platform and robust educational resources, making it a good choice for new crypto investors who are learning the ropes

## Conclusion

After comparison, it is clear that both exchanges are friendly for beginners to get started in crypto trading. However, as one of the longest-running exchanges in the world, BTCC stands out in some major aspects, like tradable coins, security, fees, customer service, etc. For most investors, whether beginners or more experienced ones, BTCC may be a better choice.

## How to Trade Crypto Futures on BTCC?

**BTCC supports trading for USDT- M Perpetual Futures contracts with a leverage of up to 500×, you can trade over 360 cryptocurrencies on BTCC at the most competitive price and highest security.**

The following sets forth the step-by-step guidance for crypto futures trading on cryptocurrency exchange BTCC:

### Step 1: Create a BTCC account

[Sign up](#) BTCC to start your journey on this leading crypto exchange.

### Step 2: Complete BTCC's identity verification

Kindly verify your identity to ensure full compliance and enhance your trading experience on BTCC. You can access the [identity verification page](#), fill out your country, upload your ID documents, and submit your selfie. You will receive a notification once your identity has been successfully verified.

### Step 3: Fund your BTCC account

On the [BTCC official homepage](#), choose “Deposit”, and then fund your account with your preferred method

### Step 4: Place your crypto futures order on BTCC

Go back to the BTCC official homepage, choose “Futures” -“USDT-M Perpetual Futures Contract”, and find the crypto trading pair that you want to trade.

Then, choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Next, adjust the leverage multiple.

**Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.**

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and the crypto futures contract order is completed.
