Cardano (ADA) Price Prediction & Analysis: Cardano (ADA) Soars 60% Post Trump's Crypto Reserve Announcement

On March 2, US President Donald Trump announced the establishment of a U.S. Crypto Reserve featuring XRP, SOL, and ADA, with a bold pledge to position America as the global leader in cryptocurrency. This unexpected move sent shockwaves through the market, dramatically shifting sentiment and driving long-term holders (LTHs) into substantial profits.

Trump's declaration of a U.S. Crypto Strategic Reserve triggered a surge in buying pressure, propelling ADA's price upward. After struggling below \$1 for six weeks, ADA broke past this key resistance level, climbing to \$1.06. The announcement further fueled a remarkable rally, with Cardano (ADA) soaring over 60% from its March 2 low of \$0.64 to a 12-week high of \$1.19.

Trump Names Five Cryptocurrencies In Strategic Reserve

Donald J. Trump ✓

@realDonaldTrump

A U.S. Crypto Reserve will elevate this critical industry after years of corrupt attacks by the Biden Administration, which is why my Executive Order on Digital Assets directed the Presidential Working Group to move forward on a Crypto Strategic Reserve that includes XRP, SOL, and ADA. I will make sure the U.S. is the Crypto Capital of the World. We are MAKING AMERICA GREAT AGAIN!

In January, U.S. President Donald Trump signed an executive order to explore the creation of a "Strategic National Digital Assets Stockpile," aiming to bolster the cryptocurrency industry after what he described as years of "corrupt attacks" under the Biden administration.

Now, Trump has officially named five cryptocurrencies—Bitcoin (BTC), Ethereum (ETH), XRP, Solana (SOL), and Cardano (ADA)—for inclusion in the proposed reserve. This announcement, made via a post on Truth Social, was the first time the specific assets were disclosed, sparking a surge in

their prices.

Having secured strong support from the crypto industry during his 2024 election bid, Trump has moved swiftly to align with its policy goals. He is set to host the first White House Crypto Summit on Friday, signaling his administration's commitment to fostering a pro-crypto environment.

Meanwhile, his family has also ventured into the digital asset space by launching its own cryptocurrencies.

ADA Skyrockets Following Trump's Announcement

The announcement that Cardano (ADA) would be included in the U.S. Crypto Strategic Reserve—alongside Bitcoin (BTC), Ethereum (ETH), Solana (SOL), and XRP—sent shockwaves through the financial markets. Investor enthusiasm surged, driving a sharp increase in ADA's price and signaling a potential shift in the cryptocurrency's long-term valuation.

Following Trump's statement, ADA soared from \$0.6468 to \$1.06, marking an impressive 60% gain within a short period. This rapid rally was accompanied by a notable rise in investor confidence, particularly among long-term holders who chose to retain their assets rather than take profits. Analysts suggest that this behavior could indicate a sustained bullish trend for ADA rather than a temporary speculative spike.

Moreover, market experts believe ADA's inclusion in the strategic reserve signals increasing institutional recognition of the cryptocurrency. The heightened attention could attract new investors and bolster Cardano's position in the highly competitive digital asset space, further solidifying its role in the evolving crypto landscape.

As of writing the article, ADA is traded at \$ 0.8198, boasting a market cap of \$ 29.0B, and witnessing a hefty 24-hour trading volume of \$ 1.4B. ADA Token saw a 24-hour change of 0.47%, with minor fluctuations of -0.58% over the past hour.

Currently, ADA is consolidating around the \$1.05 mark, a level that some analysts describe as a “bullish consolidation” phase. This could indicate accumulation before another potential upward move. To sustain its bullish momentum, ADA must hold above the critical psychological support level at \$1.00, which could serve as a strong foundation for further gains if market sentiment remains positive.

On the upside, the immediate resistance to watch is at \$1.19, while key support sits at \$1.05. A break below this level could lead to a retest of lower support zones at \$0.90 or even \$0.80.

Analyzing the hourly chart, ADA appears to be forming a contracting triangle pattern, with resistance near \$1.1450. If the price successfully clears the \$1.15 resistance zone, analysts suggest it could rally toward the \$1.22 region, with further resistance at \$1.25. However, if buying pressure weakens, ADA may retrace back to test the \$1.00 support zone.

Notably, trading volume has been declining during this consolidation phase. Some market observers view this as a typical pattern before a potential breakout, assuming key support levels continue to hold.

Cardano (ADA) Price Prediction: What's the Next?

Despite ongoing speculation and regulatory uncertainties, Charles Hoskinson remains optimistic about Cardano's long-term prospects. He has reiterated his confidence in the cryptocurrency industry's ability to adapt and overcome challenges, predicting further positive developments in the months ahead.

Beyond the excitement surrounding Cardano’s inclusion in the U.S. Crypto Strategic Reserve, institutional interest in ADA continues to rise. Grayscale, one of the world’s leading cryptocurrency investment firms, recently filed for the first-ever spot Cardano exchange-traded fund (ETF) in the United States. This landmark move could significantly enhance ADA’s mainstream adoption by providing traditional investors with easier access to the asset.

Additionally, major financial firms like Virtune and 21Shares have introduced investment products centered on Cardano, underscoring the growing appeal of ADA among institutional investors. The launch of these financial instruments signals a shift, as ADA gains traction beyond the retail market and attracts substantial capital inflows from institutional players.
