Cosmos Crypto Price Prediction 2022-2025-2030

Here we'll discuss the Cosmos crypto price prediction from popular forecast platforms, to help you make investment judgments.

What is Cosmos (ATOM)?

[Cosmos \(ATOM\)](#) is the native token of Cosmos Hub - the central chain in the Cosmos ecosystem, often referred to as the "Internet of Blockchains". Cosmos was founded by the team behind Tendermint, a BFT consensus engine. The Cosmos team held two private token sales in 2017 in order to launch their project.

Most of the [blockchain](#) applications are built on [Ethereum](#) now. But there are well-known issues with this network, most of which concern scalability (Ethereum's throughput is capped), flexibility (it's hard for EVM to accommodate all use cases), and sovereignty (the chain doesn't belong to the app's developer).

The Cosmos crypto environment is supposed to improve the experience of the blockchain app developers — and their end-users — by providing the environment for building their own, tailor-made chains easily. This way, all the issues described above can be avoided.

Cosmos ecosystem contains Cosmos Hub — the central chain to which all the other, independent, chains, built with the help of the modular SDK (software development kits), are connected. To make this all work, Cosmos utilizes layered network architecture, IBC (Inter-Blockchain communication protocol), and Tendermint BFT (the ready-made consensus and networking solution that allows the developers to focus on the application layer and not the underlying technicals).

ATOM is a staking token on the Cosmos Hub blockchain, required to secure the Proof-of-Stake network in exchange for a reward (made in ATOM tokens). The rewards are made of transaction fees as well as newly minted ATOM crypto.

Current Cosmos Price

Cosmos (ATOM) crypto's price had been affected both by the crypto market bull run of the first half of 2021 — when the price grew from \$5 to \$20-\$30 — and the following slump, which resulted in ATOM trading below \$15 for most of the summer, even dipping below \$10 for a couple of times.

Since July 2021, though, Cosmos crypto has been almost unstoppable: while its price hasn't entirely avoided the dips, it always bounces back even higher. On September 20, Cosmos crypto price hit the all-time high of \$44.70. This might have been caused by some big Cosmos crypto news, such as an upcoming Cosmos Hub upgrade and the integration of Gravity DEX.

By late September, the price has corrected somewhat, but it's still staying above \$35 for the most part. All in all, the last months' price action spells a good omen for this coin: this is a sentiment echoed by many of the ATOM crypto price predictions, which are staying predominantly positive.

ATOM Price Technical Analysis

Cosmos crypto price has dipped just below \$30 in late September in the middle of its latest bull run. This point might become a new support line, as we see a short-term (as of yet) trend reversal, which may last for a while, although now it remains to be seen. ATOM price action from September 12 until the end of the month may be interpreted as a head and shoulders pattern, which is indeed worrying.

On the other hand, the developments since the latest dip still look like a flag pattern, in which case there might be a bright future ahead for Cosmos. The experts making Cosmos (ATOM) future predictions mostly seem to support this opinion, as their future estimates remain optimistic.

Cosmos Price Forecasts

Below we have collected the most reliable price projections for Cosmos (ATOM) from popular forecast platforms.

Cosmos Crypto Price Prediction 2022

As for Cosmos price predictions for the rest of 2022, there are divergent opinions. TradingBeast expects a downturn towards \$12.433, and WalletInvestor echoes with ~\$9.3528 by the year's end. Other experts, for example, from PricePrediction.net, are more enthusiastic about Cosmos's future price, citing upwards of \$16.1076 in December.

Cosmos Crypto Price Prediction 2023

According to TradingBeast, in 2023 Cosmos price is predicted to decline to \$9.545, which makes Cosmos a poor investment option. PricePrediction.net, in turn, predicts the price drop to \$12.4704, and WalletInvestor agrees with a predicted price fall down to \$9.6126.

Cosmos Crypto Price Prediction 2025

WalletInvestor has only optimism in store for the 2025 Cosmos price prediction, valuing Cosmos at \$18.3159 by the end of 2025. TradingBeast agrees with a positive forecast and predicts, in turn, \$19.978 for the same period. On the other hand, PricePrediction.net's team is more pessimistic — their Cosmos price prediction for December of this year is just \$11.3013.

Cosmos Crypto Price Prediction 2030

Speaking of long-term Cosmos price predictions for 2030, experts present two polar opinions. WalletInvestor expresses the view that Cosmos price will grow further and eventually reach \$17.7963 by the end of the decade. PricePrediction.net's price prediction for Cosmos echoes with the projection of an uptrend to \$20.5242. Despite this, TradingBeast's vision remains not so positive, promising a downfall to \$6.9923.

In Conclusion

It is clear from the analysis quoted above that Cosmos (ATOM)'s forecasts are quite contradictory. There is no general consensus about the future positive or negative trend of ATOM price. In fact, the possible future growth depends on a variety of factors: announcements, new technical solutions for the Cosmos project, the general crypto environment, legal status, etc. We remind you that you must conduct your own research (DYOR) before investing in any cryptocurrency.

FAQ

Is ATOM a good investment?

Yes, Cosmos (ATOM) cryptocurrency is a good investment, according to most ATOM crypto price predictions. Those put ATOM price by 2022 at around \$50, which is a significant growth compared to the current price, with the potential to grow even further in the following years.

Is Cosmos (ATOM) crypto a scam?

No, Cosmos (ATOM) is probably not a scam, at least not according to industry experts. Cosmos provides a stable, usable blockchain infrastructure that has been used by Crypto.com, Binance, and other leaders in the crypto space (Cosmos lists over 255 projects). This level of trust suggests that it is doubtful that Cosmos is a [crypto scam](#).
