ETH Surges 20% After SEC Asks For New Filings: Analysts See 75% Chance of Spot Ethereum ETF Approval

The U.S. Securities and Exchange Commission (SEC) is asking exchanges to update their spot Ethereum exchange-traded fund (ETF) 19b-4 filings, indicating potential progress toward spot Ether ETF approvals. Analysts have significantly raised the odds of a spot Ethereum ETF approval, boosting hopes for regulatory green light from the US Securities and Exchange Commission (SEC).

BTCC offers over 300 virtual currency futures contracts with leverage up to 225X, if you are interested, you can start your crypto trading journey by signing up for BTCC.

Spot Ethereum ETF Approval Odds 75%: Analysts

According to a recent post shared by Bloomberg Intelligence ETF analyst Eric Balchunas, the SEC is asking the applicants to file new Form 19b-4 on an “accelerated basis” to inform the Commission of a proposed rule change.

Bloomberg ETF analysts now believe that the chances of the U.S. government approving spot Ethereum (ETH) ETFs are much more likely than previously anticipated. Eric Balchunas, Senior ETF Analyst at Bloomberg, shared that he and fellow analyst James Seyffart now give spot Ether ETF approval odds of 75%, up from the previous 25%. Balchunas attributed this change in sentiment to rumors circulating within the Securities and Exchange Commission (SEC) that suggest a potential reversal of their stance on the matter.

@EricBalchunas

Update: @JSeyff and I are increasing our odds of spot Ether ETF approval to 75% (up from 25%), hearing chatter this afternoon that SEC could be doing a 180 on this (increasingly political issue), so now everyone scrambling (like us everyone else assumed they'd be denied). See Nate's tweet below for probably order of events (but again we capping at 75% until we see more, eg filing updates)

The hot discussions indicate a potential shift in the political landscape surrounding cryptocurrencies, especially with the upcoming presidential election. "If the spot ETH ETF is approved, it will be a true shock to everyone I know in DC who's close to this process," said Variant Fund Chief Legal Officer Jake Chervinsky.

How to Buy Ethereum (ETH) ?

Under such bullish sentiment, if you decide to buy Ethereum (ETH), all you'll need is a smartphone or computer in the whole process. There are four major steps in buying Ethereum (ETH):

Step 1: Compare crypto exchanges

Choosing a most suitable exchange is the most important step to start your trading journey. However, due to the rapid development of cryptocurrency market, large number of crypto exchanges emerged, making it a overwhelming task for investors to select a best exchange based on their demand and preference.

For more information about selecting a best crypto exchange in Canada, please read related article: **How to Choose Best Crypto Exchanges in Canada**

Step 2: Open an account

If you are a novice trader in Canada, the second step is create an account on the crypto exchange you select. The most common step about this step is verify your email address and identity.

Step 3: Fund your account

Once you create an account, you need to make a deposit. Usually, there are multiple ways to make a deposit, like debit card, credit card, wire transfer, or Bitcoin.

Step 4: Buy Ethereum

The last step is just use your funds to purchase ETH.

Step Four: choose the contract trading order type. BTCC contract orders are divided into market orders, limit orders and SL/TP orders.

- **Market Order:** users place orders at the best price in the current market to achieve fast trading.
- **Limit Order:** Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order:** SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Step Five: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Step Six: choose the lot size and set the SL/TP price .

Step Seven: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Eight: click the buy or sell button, and the Ethereum (ETH) futures contract order is completed.
