How to Trade Ethereum (ETH) Futures on BTCC

[Ethereum](#) (ETH) futures contracts are among the most robust in the [cryptocurrency](#) industry, with daily volume on the main [crypto exchange](#) doubling that of [Ethereum](#) spot trades throughout the market. Ethereum futures allow investors to profit from fluctuations in the price of Ethereum in the short term, amplify their investment returns, and reduce risk.

In order to get started with ETH futures contracts, you should read this.

Deposit and Receive Up to 10,055 USDT

What is ETH Futures Contracts

Futures contracts on Ether (ETH), the cryptocurrency that fuels the Ethereum network, allow investors to speculate on whether the value of ETH will rise or fall in the future. Futures contracts are agreements to purchase or sell an asset at a future date; however, ETH futures are settled in

cash rather than ETH.

Futures contracts based on ETH are known as ETH futures contracts, however ETH itself is not the underlying asset. In this scenario, Ether (ETH) is the underlying asset from which a derivative “derives” its value. When you trade a derivative, you aren’t actually buying or selling the underlying asset, but rather a representation of it.

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

How do ETH Futures Work

Commodity markets have a long history of using futures as a trading instrument because they provide a means for sectors to smooth out price fluctuations and for speculators to speculate on future price swings. Futures can also be used to insure against short-term price fluctuations that would otherwise reduce the value of an investor’s holdings.

In finance, a futures contract is a legally binding agreement between two parties to acquire or sell an asset at a specified future date and price. Some Ethereum (ETH) futures contracts, such those traded on Binance and the Chicago Mercantile Exchange (CME), settle for their cash value rather than the actual Ethereum (ETH) being transferred between the buyer and seller.

Many ETH futures deals, however, employ a form of this contract structure known as perpetual futures, which never expire and for which delivery is not necessary. The price of a perpetual futures contract is often linked to the asset’s actual market value over the duration of the trade.

You may be able to pick between regular futures, which are contracts for the real asset (ETH) or a cash settlement, and perpetual futures, a derivative that neither necessitates nor has an end date, depending on the exchange you use.

How to Trade Ethereum (ETH) Futures on BTCC

- **STEP 1: Open the webpage of BTCC futures trading**
- **STEP 2: Choose the type of ETH futures contract to buy**
- **STEP 3: Choose the order types of ETH**
- **STEP 4: Choose the level of leverage**
- **STEP 5: Choose the lot size**
- **STEP 6. Set take profit and stop loss targets**
- **STEP 7.Choose the price direction: Buy when bullish, Sell when bearish**

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

STEP 1: Register an Account

Visit the BTCC website and create an account. Provide the requested information, complete the verification procedure, and implement any necessary security measures, such as two-factor authentication (2FA).

1. 1 Open an Account

Creating a new account is the initial stage in beginning to trade on BTCC. To prevent falling victim to phishing attacks, ensure that you visit the official BTCC website and select the “Register” icon

located at the top of the page.

The screenshot displays the BTCC website's registration page. On the left, there are two promotional banners. The top banner, titled 'Limited time only: Claim your 10055USDT welcome reward', features a countdown timer showing 12h, 48m, and 24s, along with an illustration of a penguin holding a document. The bottom banner, titled '0 security incidents since 2011 Safest futures exchange in the world', lists key features: 225X Leverage, 200+ Cryptocurrencies, 0.045% Max. fee, and 0.01% Min. fee, with a call to action to 'Upgrade to VIP for amazing privileges!'. On the right, the 'Create Account' section includes the text 'Registration takes only 30 seconds' and radio buttons for 'Email' and 'Mobile' registration. Below these are input fields for 'Email address' and 'Create a password' (with a toggle for visibility). A 'Referral code (optional)' field with a dropdown arrow is also present. A prominent blue 'Register now' button is located below the input fields. Underneath the button, the text 'Or register via' is followed by four social media icons: Google, Facebook, Apple, and a BTCC logo. At the bottom of the registration section, a small line of text states: 'By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#)'.

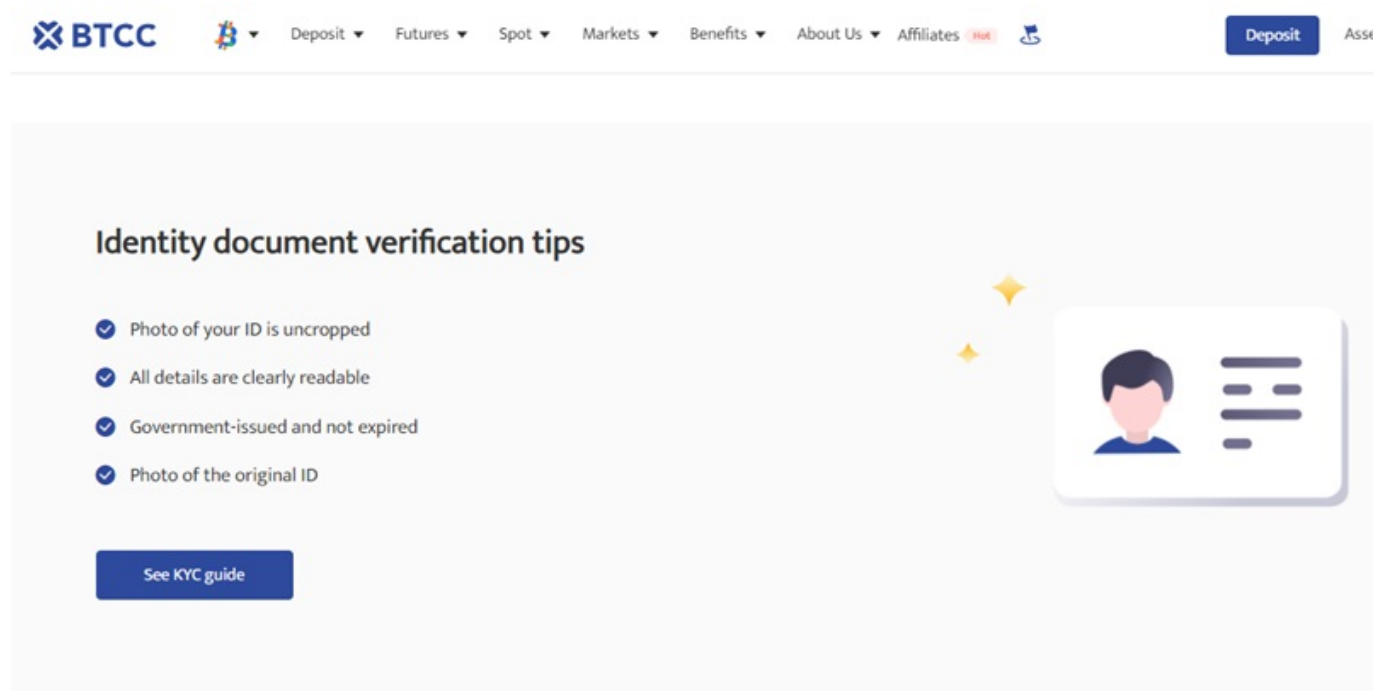

This will redirect you to the registration page, where you will be required to submit some basic information, including your email address or phone number and a password. Enter the Referral code below to receive rewards if you have been referred by another BTCC user.

Next, you will receive a confirmation email to validate your identity. Execute the procedure by adhering to the instructions provided in the email. This procedure guarantees that your new BTCC account is exclusively accessible to you.

2.2 Verify Your Identity

In order to comply with KYC/AML regulations, licensed crypto exchanges such as BTCC are required to identify all registered users. To accomplish this, you will require a government-issued identification document, such as a national ID, passport, or driving license.

Not only will your account be verified, but your daily transaction limit will be increased, and you will be eligible for a variety of special offers (coupons/rebates) by uploading a photo of your document(s).

2.3 Secure Your Account

It is imperative to safeguard your account and prevent unauthorized transactions or access once it has been verified. You can simply activate two-factor authentication (2FA) in your account settings, which adds an additional layer of security.

Furthermore, it is crucial to employ a password that is both unique and complex, and it may be beneficial to employ a password manager. It is imperative to safeguard your investments by ensuring the security of your account.

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

STEP 2: Deposit Funds

After you've created your account, you'll need to finance it. BTCC may accept numerous deposit methods, including bank transfers, cryptocurrency deposits, and other payment choices. Select the way that works best for you and follow the instructions to deposit funds into your account.

2.1 Choose Fiat Currency to Deposit

Click to operate :<https://www.btcc.com/en-US/user-center/assets/deposit/usdt>

Deposit in fiat currency is to use credit card or other fiat currency channel to buy and deposit money. As the global fiat currency channel varies, the actual situation needs to be based on the current fiat currency channel used by BTCC to carry out relevant operations.

Choose service provider

The real-time quotes are for reference only. Please refer to the respective service providers' websites for the actual exchange rate.
By continuing, you agree to BTCC Terms & Conditions.

Service provider		Single purchase limit	Reference price	Paying amount	
 Visa/Mastercard (Best offer)		5 ~ 5000 USD	1USD/USDT	500.00USD	Pay now
Limited-time offer: Get 3% cashback on every crypto purchase from a 10,000 USDT prize pool					
 moonpay		200 ~ 50000 USD	1.01508USD/USDT	527.54USD	Pay now
 simplex		200 ~ 50000 USD	1.06USD/USDT	552.00USD	Pay now

Select the purchase quantity and payment currency, then click Pay Now on the corresponding payment method to proceed to payment.

After successful purchase, the payment will be credited to your BTCC account within 2~30 minutes. Blockchain network conditions or service provider status may affect the crediting time.

If you encounter any problems when making a deposit, please contact our customer service via the bottom right corner of this page.

2.2 Select Crypto Deposit

Click to Operate : <https://www.btcc.com/en-us/user-center/assets/deposit/crypto>

Here's a quick guide on how you can make deposits on our platform.

1. Go to the the **Assets** page on our website. Tap **Deposit**.
2. Select the type of cryptocurrency that you would like to make a deposit in. Tap Deposit to make a deposit of crypto such as USDT/BTC/ETH/XRP.
3. If you are depositing USDT, you will see the available networks for this currency, including USDT-OMNI, USDT-ERC20, USDC-TRC20,
4. Please choose the deposit network carefully and make sure that the selected network is the same as the network of the platform you are withdrawing funds from. That is to say, if you select the wrong network, you will lose your funds.
5. Copy your BTCC Wallet's deposit address and paste it to the address field on the platform you intend to withdraw crypto from. Alternatively, you may also scan the QR code.

Notes on depositing crypto

1.This is the USDT-TRC20 address.Please do not deposit cryptocurrency other than USDT-TRC20,otherwise,you may lose your assets.

2.The minimum top-up amount is 2USDT-TRC20. Any top-up amount smaller than this will not be credited and will not be refunded.

3.The transaction will have to be confirmed by the blockchain network nodes after the deposit is made to the address. Therefore,the deposit of [USDT-TRC20] may be affected by network congestion at times. Your patience is greatly appreciated.

2.3 Convert

BTCC offers futures trading, which enables users to leverage up to 225x on over 300 USDT-margined and coin-margined perpetual contracts. Traders may generate profits by maintaining either long or short positions.

If the user does not possess USDT, it will suggest that they exchange USDT at BTCC. This tool enables users to instantaneously convert over 200 distinct types of cryptocurrencies into USDT, enabling them to trade USDT-margined futures on the platform.

The BTCC Conversion Function is a beneficial addition to the toolkit of a merchant. This enables BTCC consumers to convert the crypto they possess into USDT in a matter of seconds. This eliminates the necessity for users to undergo the time-consuming process of transferring cryptocurrency from their wallet and subsequently converting it to USDT.

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

STEP 3: Start Trading

3.1 Choose the type of crypto futures

BTCC supports a range of cryptocurrency trading pairs. Select the trading pair you want to trade. For example, if you want to trade Bitcoin for Ethereum, you would choose the BTC/ETH trading pair.

3.2 Choose the order types of ETH

Select the order types for ETH at the top right of the page. The order types at [BTCC](#) included market orders, limit orders and stop loss orders.

The screenshot displays the BTCC trading interface. At the top, there is a 'Leverage' dropdown set to '20x' and a gear icon for settings. Below this are 'Open' and 'Close' buttons, with a calculator icon to the right. A red rectangular box highlights the order type selection area, which includes 'Market', 'Limit', and 'SL/TP' options. Underneath, there is a 'Best Bid Price' label. A 'Quantity' input field is followed by a 'BTC' dropdown menu. The 'Contract Value' is shown as '0.00USDT' with a horizontal slider below it. A checkbox labeled 'Set TP/SL' is present, along with 'Free' and '0.00USDT' text. At the bottom, there are two large buttons: 'Open long' (green) and 'Open short' (red). Below these buttons, the 'Max long' and 'Max short' values are both '0.00 BTC', and the 'Margin' is '0.00 USDT' for both.

- Market orders: Users place orders at the best current price to execute buy or sell order instantly.
- Limit order: A limit order is a type of order set by the trader to buy or sell at a specified price

level or better. The buy order will be executed at the limit price or a lower one, while the sell limit order will be executed at the limit price or a higher one. The limit order can be seen by the market, which has given the opportunity for market participants to fill the buy or sell order.

- Stop order: A stop order, also known as the stop-loss order is a type of order set by the trader to buy or sell at a specified price level. The order will be executed automatically after a certain price level has been reached.

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

3.3 Choose the level of leverage

You can adjust the level of leverage based on your need. For example, the leverage of ETH's weekly contract included 10x, 20x, 50x, and up to 100x leverage.

×

STEP 4: Stay Informed

Keep track of market movements, news, and other factors that may influence cryptocurrency pricing. BTCC may offer real-time market data, trading charts, and analysis tools to assist you make informed trading decisions. Staying educated can help you optimize your trading tactics.

[TRADE_PLUGIN]ETHUSDT,ETHUSDT[/TRADE_PLUGIN]

How To Long ETH Futures?

In a long ETH futures position, you wager that the price will increase in the future. Nevertheless, because you are trading futures, you can also employ leverage to boost your trade's profit. For instance, suppose you wish to invest \$1,000 and believe the price of ETH would rise. You decide to utilize 3x leverage, which, if you are correct, will treble your profits.

In this example, your initial margin is \$1,000, allowing you to acquire ETH futures worth \$3,000. If ETH increases by 5%, your position is now worth \$3,150 and your equity is \$1,150. $\$1,000$ (starting margin) + $\$150$ (unrealized gain) = $\$1,150$

However, if the price of ETH decreases, you lose part (or all) of your trade equity. Suppose the price decreases by 5%. The trade is incurring a loss of \$150, and your equity has decreased from \$1,000 to \$850.

Fortunately, the trade's maintenance margin is likely set at 50% of the initial margin, giving you a \$500 cushion before a margin call. You have a cushion of \$350 remaining before reaching your maintenance margin. $\$850$ in remaining equity minus $\$500$ in maintenance margin equals $\$350$.

Trade ETH futures on [BTCC](https://www.btcc.com/en-US/trade/perpetual/ETHUSDT) Now: <https://www.btcc.com/en-US/trade/perpetual/ETHUSDT>
