Is CoreWeave IPO a Good Investment? Everything You Need to Know

Artificial intelligence (AI) has become a generational megatrend in the last two years, which is uncommon in the capital markets. A closer look at these trends reveals that, over the past two years, investors have mostly gravitated into a tiny cohort of megacap stocks, even though the S&P 500 reported total gains of 26% and 25% in 2023 and 2024, respectively.

The market has reached new heights thanks in large part to the combined performance of the “Magnificent Seven”: Nvidia, Microsoft, Alphabet, Amazon, Meta Platforms, Apple, and Tesla.

However, the Magnificent Seven have had a difficult start to the year; as of this writing, all save Meta have had negative returns.

From a macro standpoint, I believe that some investors are apprehensive about the short-term prospects of their once-favorite stocks because of the uncertainties around tariffs and the continuous expenditure on AI infrastructure. Furthermore, some of them might just be seeking fresh chances for development since they are tired of the Magnificent Seven.

And an initial public offering (IPO) is the best place to search for growth, isn't it? Well, perhaps.

Let's examine CoreWeave, a data center infrastructure specialist supported by Nvidia, which is AI's most anticipated new initial public offering (IPO) company. I hope that investors will have a clear understanding of whether or not investing in the CoreWeave offering is a wise decision at this time after examining a few well-known technology IPO stocks from recent years.

1 Snowflake IPO Analysis

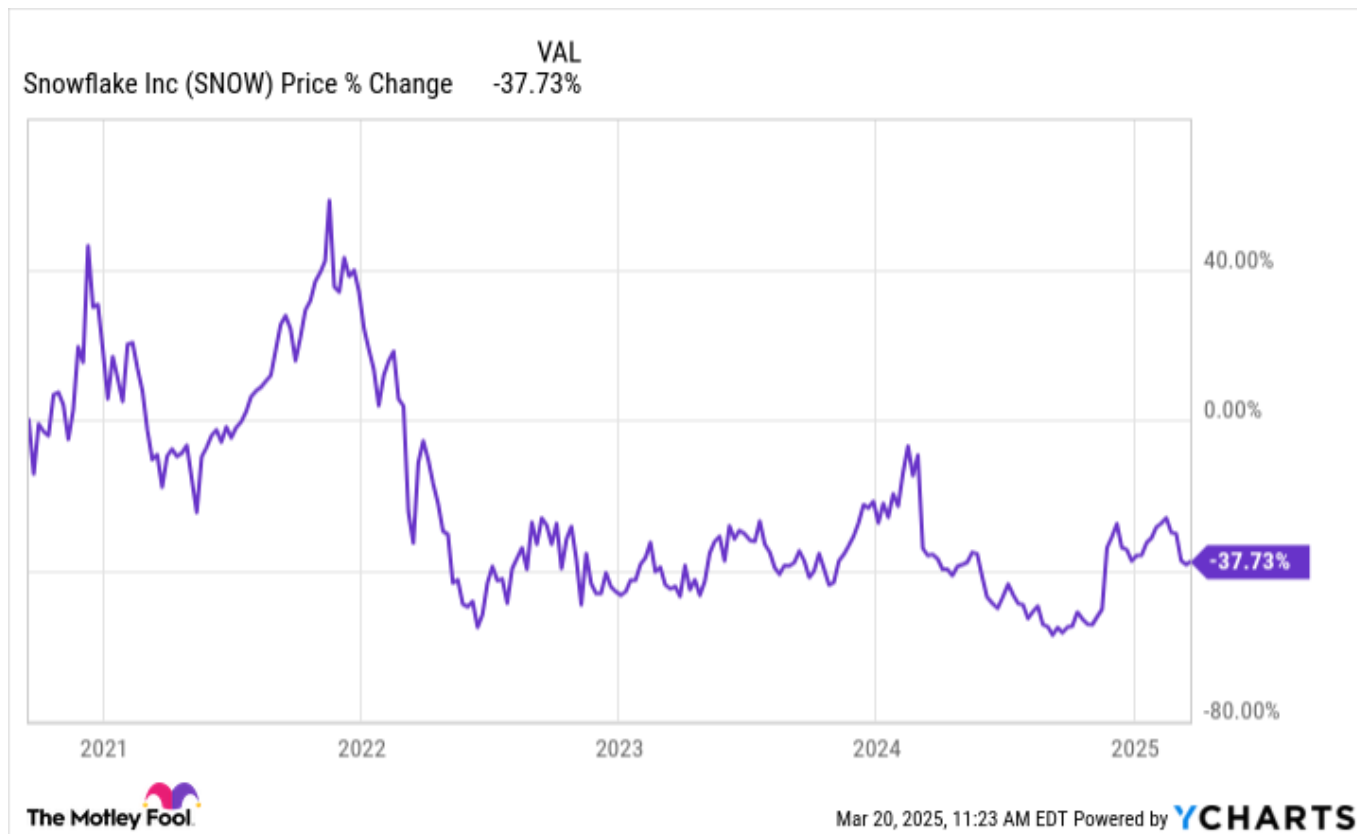

New York Stock Exchange-listed corporate software firm Snowflake went public in September 2020. I can't think of a more hyped initial public offering (IPO) in the recent past than this one.

Snowflake appeared to be an easy choice, what with support from prominent strategic investors like Salesforce and Warren Buffett's Berkshire Hathaway in addition to world-renowned venture capital firms like Sequoia, Altimeter, and Redpoint.

On the first day of trade, shares started at \$245 and went up to \$319. After only one day on the market, Snowflake had become the biggest software initial public offering (IPO) ever.

There was definitely a lot of elation when it first became a public corporation, but that excitement didn't last. A few years ago, when artificial intelligence (AI) was the next big thing in the industry, Snowflake didn't seem to be doing much of anything. It was unable to entice investors like some of its software competitors by promising them that artificial intelligence would be a game-changing prospect with sustained high-margin growth.

Berkshire Hathaway sold its entire stake in software firm Snowflake after its chief executive officer left a few years following the company's first public offering.

The stock's performance since going public is seen in the chart above. The chart clearly shows that throughout the company's early years as a public corporation, there were several instances of unexpected price increases. Shares have fallen about 38% from their initial public offering (IPO) price due to investors' growing distaste for the stock in recent years.

2. Palantir IPO Analysis

Palantir Technologies, a competitor in the enterprise software space, debuted on the New York market just two weeks after Snowflake went public.

During Palantir's first public offering (IPO), the narrative was completely different from that of

Snowflake. Very few Wall Streeters fully understood its business strategy.

As a result of Palantir's tight (and clandestine) ties to the Pentagon, many investors saw the firm more as a consulting firm or government contractor than a genuine technological platform.

Its initial trading day wasn't particularly noteworthy. After starting the day at \$10, shares ended the day at \$9.50, a little lower.

Gaining the support of institutional investors was a major obstacle for the company in its early years as a public corporation. In a paradox that will last forever, Snowflake and Palantir were the ones on Wall Street that began to take notice of the rise of AI.

After launching its AI platform in April 2023, Palantir has successfully diversified its revenue streams away from government contracts. It has recently formed partnerships with numerous prominent private AI developers, such as Databricks, Oracle, Microsoft, and Amazon.

Through the discovery of new opportunities in the commercial sector, Palantir has consistently increased revenue growth, widened profit margins, and mints free cash flow. A stock that was barely visible in the tech industry three years ago suddenly rose to become one of the best-performing S&P 500 companies last year.

Actually, you would have an 838% gain if you had invested in Palantir during its initial public offering and stayed on until now.

Conclusion

The stories about CoreWeave's impending initial public offering (IPO) are similar to those of Snowflake. If CoreWeave's initial public offering (IPO) goes well, it will be the first big IPO for an

artificial intelligence unicorn in the past few years, and it may pave the way for other prominent private tech businesses to follow suit.

The essay makes one thing very clear: there is a lot of risk involved with buying stocks during an initial public offering.

Investors who aren't cautious could get entangled in a bad momentum trade and wind up holding the bag if the excitement surrounding CoreWeave leads to some outsized purchasing activity.

I think it would be wise to wait for some time to pass before judging CoreWeave's operational performance in its first few quarters as a public business. There will be plenty of opportunities for long-term investors to acquire at different price points if they so desire. But for the time being, I believe it is prudent to wait for the IPO to settle in, and smart investors would do well to keep an eye on the company's development over the coming months.

The stock price of CoreWeave should eventually start to move in a more fundamental direction, reflecting the company's true underlying performance.

Why Choose BTCC?

Founded in 2011, BTCC is among the world's oldest and most reliable bitcoin exchanges. Many traders use BTCC because it has established a solid reputation in the market for security and regulatory compliance over the years. The platform is especially well-suited for traders in North America and Europe, with presences in the US, Canada, and Europe.

In addition to bitcoin trading, BTCC provides traders with access to non-crypto assets including gold, silver, and U.S. equities through cutting-edge features like copy trading, perpetual futures, and tokenized stocks. Both novice and seasoned traders searching for a secure and regulated platform can benefit from BTCC's range of offerings.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- Numerous transferable assets
- Excessive trading leverage
- Strong copy trading capabilities
- Perfect security record
- Interface that is easy to use
- Accessible to traders in the US and Canada

How to Trade Crypto on BTCC?

This brief instruction will assist you in registering for and trading on the BTCC exchange.

Step 1: Register an account

The first step is to hit the “Sign Up” button on the BTCC website or app. Your email address and a strong password are all you need. After completing that, look for a verification email in your inbox. To activate your account, click the link in the email.

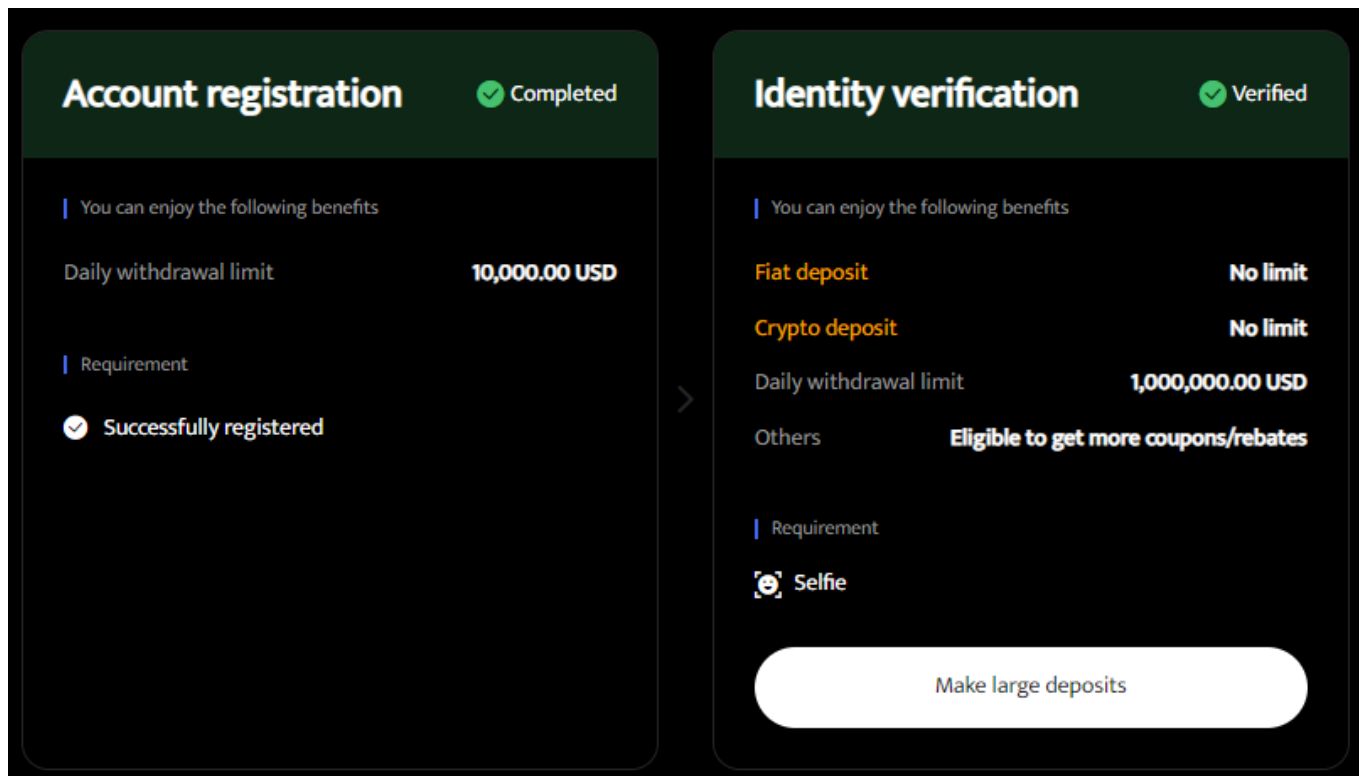

The screenshot displays the BTCC website's registration interface. On the left, a promotional banner features a cartoon fox character holding a document with a green 'T' logo. The text reads: "Limited time only. Claim your 10,055USDT welcome reward". Below this is a countdown timer showing "08h : 39m : 07s" and a blue arrow pointing right. Further down, another banner says "Stay Ahead, Stay Secure, with BTCC" and lists four key features: "250X Leverage", "300+ Cryptocurrencies", "0.045% Max. fee", and "0.01% Min. fee". A small crown icon with the text "Upgrade to VIP for amazing privileges!" is also present.

The right side of the image shows the "Create Account" form. It includes the heading "Create Account" and the subtext "Registration takes only 30 seconds". There are two tabs: "Email" (selected) and "Mobile". The form contains three input fields: "Email address", "Create a password" (with a strength indicator icon), and "Referral code (optional)". A large white "Register now" button is positioned below these fields. Underneath the button, it says "Or register via" followed by three social media icons: Google, Apple, and Telegram. At the bottom of the form, a small line of text states: "By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#)."

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using
Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment
methods and 0 transaction fees.

I have crypto assets

Crypto Deposit

Get the deposit address for BTC, ETH, or any
other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly

interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money

laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
