All Time High	\$0.0000002219
All Time Low	\$0.00000003207

Pepe 2.0 Price History

Pepe 2.0 launched on 27 June with an opening price of \$0.0000000001394. However, the low price was short-lived.

The price soared to \$0.00000009518 on 30 June. Subsequently, PEPE2.0 retraced, finding support at \$0.00000002215 on 2 July.

However, it has since undergone an even more explosive rally, reaching highs on 7 July of \$0.0000002219.

Currently, the price is amid a pullback, trading at \$0.000000063. Still, the Pepe 2.0 price chart shows signs that the price is finding support in this range.

Despite launching recently, Pepe 2.0 has already amassed a market cap of \$26.15 million and a \$23.16 million 24-hour trading volume. The Pepe 2.0 liquidity pool has 6364.55 billion pooled Pepe and 530.74 pooled ETH. 82.12% of this is locked for 11 months, and the smart contract is

renounced.

There are currently 13.84K holders and 30.11K total transactions.

Pepe 2.0 Price Prediction 2023

Since Pepe 2.0 is in its infancy, very little is known about the coin to predict where it could be headed in the following months or years.

That said, the team has provided us with some insight on the project's future, and we have social and on-chain metrics which can be analysed to forecast the Pepe 2.0 price.

The first thing to do is break down the Pepe 2.0 price chart. As mentioned above, the price is currently pulling back. However, it is respecting its previous resistance level as a support, indicating a reversal may be ahead.

Despite being newly launched, the project has amassed a significant market cap and over 13K holders. This adds extra versatility to the Pepe 2.0 price since a large community reduces the effects of sell pressure.

However, one of the issues with the project is that its Twitter account is currently suspended. Twitter holds substantial importance for meme coins since they are community-driven, and it is one of the best ways to interact with the community.

Still, the project boasts a Telegram community of over 8K members.

According to the Pepe 2.0 website, the project is "taking everything you loved about the original Pepe and catapulting it into a whole new dimension of excitement".

Pepe 2.0 aims to be an enhanced version of Pepe. While this may seem challenging to achieve, the project's rapid growth means people believe it is possible.

With this in mind, we forecast the coin can push forth this year. Our Pepe 2.0 price prediction 2023 estimates possible lows of \$0.00000009 and highs of \$0.000000133.

However, some key support zones remains crucial to the performance of Pepe 2.0. If they break, investors will likely lose confidence and begin to panic sell their coins, causing price capitulation.

Pepe 2.0 Price Prediction 2025

One of the reasons for Pepe 2.0's early success is that it has gained exchange listings on KuCoin and [BTCC](#). This has provided the project with extra liquidity and made it more accessible to beginner crypto investors.

If Pepe 2.0 can attain more high-profile exchange listings, we could see its price surge. We saw this when the original Pepe's price exploded following its Binance listing.

The Pepe 2.0 team has also spoken of several interesting project developments which could attract many new investors to the community.

Its 2.0 website shows there will be a PFP NFT collection available in the future. Although NFTs have declined in popularity, markets are cyclical, and Pepe 2.0's NFT collection could capture attention if NFT hype reignites.

On the other hand, however, a YouTuber has recently voiced concerns about the project. In a recent video, Drolby Crypto highlighted how he suspects the project is withholding coins they are not telling the community about.

He also pointed out that the project also features a 1% buy and sell tax. The YouTuber traced the fee and found it is being dumped, and the earnings are being sent to Binance wallets. According to Dolby Crypto, this is suspicious and prompts leadership concerns for Pepe 2.0.

Considering this, plus the volatile nature of meme coins, it is difficult to foresee Pepe 2.0 lasting until 2025. Moreover, the lack of uniqueness means it will be difficult for it to continue generating hype long-term.

Nevertheless, the project has performed well so far, so there is still potential for a strong performance in 2025.

Considering this, our Pepe 2.0 price prediction 2025 forecasts that at the very highest, Pepe 2.0 price may reach \$0.000000375 by 2025. The estimated minimum price could be \$0.000000248.

See also: [Pepe Price Prediction 2023, 2025, 2030](#)

Pepe 2.0 Price Prediction 2030

Most meme coins are not designed to be long-term cryptoa. Other than some exceptions like Dogecoin and Shiba Inu, most meme coins cannot retain their community's interest long-term.

However, many critics believed Dogecoin and Shiba Inu would collapse too, and they have since proven doubters wrong, with Dogecoin still going up almost 10 years after its launch. With that in mind, there remains potential for Pepe 2.0 to succeed long term.

Still, the main Pepe 2.0 issue is that it features no originality beyond its NFTs. This will make it hard for its community to remain confident if the price drops, likely causing the selling pressure to snowball and wipe out potential gains.

This is the most likely scenario for Pepe 2.0 long-term, but we also acknowledge that meme coins often do unexpected things, so there is still potential for Pepe 2.0 to become one of the top meme coins.

With this in mind, our Pepe 2.0 price prediction 2030 forecasts that Pepe 2.0 price is expected to range between \$0.000000522 and \$0.000000601 in 2030.

However, it's important to keep in mind that meme coins are highly volatile, and the prediction should be taken with a grain of salt.

What Exactly is Pepe 2.0 Coin?

Pepe 2.0 is a newly created meme coin based on the popular Pepe coin but aims to improve on some of its shortfalls. So far, the project has proven massively popular, amassing over 13K holders and a \$26.15 million market cap.

There are no uses for the Pepe 2.0 crypto except to trade, speculate and be a part of the Pepe 2.0 community. Still, this may change in the future as the project's website says Pepe 2.0 will unleash "cutting-edge advancements and awe-inspiring innovations".

So far, the only development is an upcoming NFT collection. However, the Pepe 2.0 website shows that NFT sales will be denominated in ETH rather than PEPE2.0, meaning the coin will still lack utility.

What Factors May Affect the Pepe 2.0 Price?

The main driver behind the Pepe 2.0 price is hype and fear of missing out. As we saw with the rise of the original Pepe coin, meme coins can quickly explode in value, leaving behind those who were slow to buy. This causes investors to flock to new rising meme coins, driving up their prices.

Another driver of the Pepe 2.0 price is exchange listings. KuCoin's and BTCC's listings have had a profound effect on its price. Looking ahead, if more tier-one exchanges like Binance, Coinbase or Kraken list Pepe 2.0, this could generate much more hype and awareness, bolstering the price.

Finally, the team will be instrumental in the project's future success. If the team work hard to bring new developments to the project, we may see it outperform Pepe long-term. On the other hand, if the team go quiet once the initial hype dies down, the price will likely collapse shortly after.

Final Words

The future of meme-based projects like Pepe 2.0 is not certain. While it has the potential to climb higher, the large market cap combined with the lack of utility and originality means it is also high-risk.

Some experts believe that memecoins, including Pepe 2.0, will continue to be a significant part of the cryptocurrency trading landscape.

Another possibility is that Pepe 2.0 will meet the same fate as other short-lived memecoins like Grimacecoin and Pump Coin.

For investors, including those holding a significant number of Pepe 2.0 tokens, the question is

whether they can make a profit before the community's attention moves on to other cryptocurrencies. Memecoins are like a trend on TikTok - they come and go fast.

It's essential to conduct a thorough research and only invest a very small amount, and if it goes higher, you make a good amount of money, else you lose very little.

In closing, please know the forecast figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned. Forecasts are not immune to changing circumstances and will be updated with new developments. Always do your own research and evaluate all necessary factors before making any investment.
