Will SHIB Reach 1 Cent? 2025 Shiba Inu Price Prediction & Analysis

If you're wondering "Will SHIB reach 1 cent?", you're not alone. This question has flooded search engines since Shiba Inu (SHIB) took the crypto world by storm in 2021. As we move through 2025, interest in meme coins is resurging, and investors are once again speculating on whether this beloved dog-themed token can hit the much-anticipated \$0.01 milestone.

This article offers an in-depth analysis using long-tail SEO keywords like "will Shiba Inu coin reach 1 cent," "SHIB price prediction 2025," and "can SHIB hit \$0.01," making it your one-stop resource for understanding the viability of SHIB reaching this target.

What Is SHIB?

Shiba Inu (SHIB) is an ERC-20 token created in August 2020 by an anonymous developer known as Ryoshi. It was originally dubbed the "Dogecoin killer" and quickly gained traction as a meme coin

with viral potential.

Key facts:

- Based on Ethereum blockchain
- Total supply: 1 quadrillion tokens (though now partially burned)
- Use case: DeFi, NFTs, metaverse, and payment integrations
- Community-driven: Over 1 million holders

The 1-Cent Dream: Why It Matters

The idea of SHIB hitting \$0.01 may seem like just another crypto fantasy, but for early adopters, it's more than just a number—it's a life-changing possibility. For example:

- If SHIB hits \$0.01, someone holding 10 million tokens (worth ~\$190 today) would see their investment rise to \$100,000.
- Many retail investors use this target as their retirement hope or financial freedom goal.

Current SHIB Price Analysis

As of July 2025, SHIB is trading at approximately \$0.000019.

Market Metrics:

- Market Cap: ~\$11 billion
- Daily Volume: ~\$300 million
- Rank: #16 on CoinMarketCap
- Circulating Supply: ~589 trillion SHIB

Despite being far from 1 cent, SHIB has outperformed many altcoins this year with a 65% YTD gain, mainly driven by:

- Shibarium adoption
- Continued token burns
- Ethereum Layer-2 integration

Will SHIB Reach 1 Cent?

Let's break this down mathematically.

If the current circulating supply is around 589 trillion tokens, SHIB would need a market cap of \$5.89 trillion to reach \$0.01.

That's more than 5x the entire crypto market cap in mid-2025.

So, under current conditions, SHIB will not reach 1 cent unless:

- A massive token burn reduces supply significantly
- Or the entire crypto market enters an unprecedented supercycle

Key Factors Affecting SHIB's Price

1. Token Burn

The biggest factor influencing SHIB's ability to reach 1 cent is how much supply is burned. The more tokens removed from circulation, the higher the price can go.

2. Shibarium

Shibarium is SHIB's Layer-2 blockchain, built on Ethereum. It aims to:

- Reduce gas fees
- Improve scalability
- Facilitate SHIB's use in DeFi and NFTs

3. Mass Adoption

Shiba Inu needs real-world utility to gain value. Recent moves include:

- Partnerships with payment platforms
- Listing on major exchanges like Binance and Coinbase
- NFT and gaming ecosystem expansion

4. Market Sentiment

SHIB's price is heavily influenced by retail hype and social media trends. Celebrity tweets, Reddit forums, and viral videos can trigger price spikes overnight.

SHIB Tokenomics Explained

- Initial Supply: 1 quadrillion
- Burned: Over 410 trillion SHIB sent to a dead wallet
- Current Supply: ~589 trillion
- Maximum Supply Cap: None (but deflationary via burns)

SHIB also introduced BONE, LEASH, and TREAT tokens to support the broader Shiba ecosystem.

Burn Mechanism and Its Role

Shiba Inu has implemented several burn strategies to reduce supply:

- Shibburn portal: Community can burn tokens voluntarily
 - Shibarium burns: A percentage of transaction fees are burned
 - New projects in the SHIB ecosystem (like SHIB The Metaverse) integrate burning in their design
- Over 250 billion SHIB tokens were burned in Q2 2025 alone.

Still, for SHIB to hit 1 cent, 99%+ of current supply would need to be eliminated or locked.

SHIB vs Dogecoin: Which One Will Hit \$0.01 First?

Interestingly, SHIB is already worth far less than 1 cent, while DOGE is trading at around \$0.10-\$0.15.

Comparison:

Feature	SHIBA INU (SHIB)	DOGECOIN (DOGE)	Advantage
Supply	589T (Circulating)	145B (5.2B new/yr)	DOGE (Scarcity)
Price	\$0.000019 (-78% from ATH)	\$0.12 (-85% from ATH)	-
Use Case	<ul style="list-style-type: none"> • DeFi (ShibaSwap) • NFTs • L2 (Shibarium) 	Payments/Tipping	SHIB (Utility)
Tokenomics	Deflationary (Burning)	Inflationary (10k DOGE/min)	SHIB
Burn Mechanism	Yes (5B SHIB/day via Shibarium)	No	SHIB
Market Cap	\$11B (#16)	\$44B (#9)	DOGE
24h Volume	\$300M	\$1.2B	DOGE
Blockchain	ERC-20 (Ethereum)	Own L1	-
Adoption	1.3M Shibarium wallets	Tesla merch, Twitter tipping	DOGE

Feature	SHIBA INU (SHIB)	DOGECOIN (DOGE)	Advantage
Institutional Interest	Grayscale SHIB Trust	Elon Musk endorsements	DOGE

So, while DOGE might rise more easily, SHIB has more burn mechanisms and ecosystem development in play.

SHIB in 2025: Expert Forecasts

Several analysts have released SHIB predictions for 2025 and beyond.

WalletInvestor:

- Bullish scenario: \$0.00005
- Bearish scenario: \$0.000009

CoinPriceForecast:

- End of 2025: ~\$0.00003

Gov Capital:

- Predicts long-term viability but not \$0.01 without aggressive burns

Realistically, hitting \$0.001 (1/10th of a cent) is more feasible in a strong bull market.

Is SHIB a Good Investment Now?

SHIB may not reach 1 cent soon, but it could still offer decent returns under the right market conditions.

Pros:

- Low entry price
- Strong community
- Expanding ecosystem (Shibarium, NFTs, Metaverse)

Cons:

- Massive supply
- Speculative
- Limited real-world use so far

If you invest in SHIB, treat it like a high-risk asset, and only invest what you can afford to lose.

Conclusion: Will SHIB Ever Hit 1 Cent?

Short Answer: Not likely under current conditions.

But that doesn't mean it's impossible. Reaching \$0.01 per SHIB would require:

- Over 99% token burns
- Mass adoption across payments, DeFi, and NFTs
- Several market cycles of exponential growth
- Sustained retail investor interest

Realistically, \$0.0001 to \$0.001 is more plausible by the end of the decade.

FAQs

Will SHIB reach 1 cent in 2025?

Highly unlikely unless 99%+ of supply is burned or locked. However, a strong bull market could push SHIB past \$0.

Will SHIB reach 1 cent in 2025?

Highly unlikely unless more than 99% of tokens are burned and the market enters a historic bull run. Most forecasts put SHIB at \$0.00005–\$0.0001 by late 2025.

What would SHIB's market cap be at \$0.01?

If SHIB reaches \$0.01 with 589 trillion tokens, its market cap would be \$5.89 trillion—more than Apple, Amazon, and Bitcoin combined.

Can Shibarium help SHIB hit 1 cent?

Yes, but not alone. Shibarium supports burns and usage, which helps. But extensive burns + mass adoption are needed.

What's a realistic SHIB price in 2030?

Estimates vary, but \$0.0001 to \$0.001 is a more realistic long-term target, assuming steady burns and ecosystem growth.

How many SHIB tokens do I need to become a millionaire?

If SHIB hits \$0.001, you'd need 1 billion SHIB tokens (\$19,000 as of now). If it hits \$0.01, you'd need just 100 million (~\$1,900 today).

How can I track SHIB burns?

Visit shibburn.com or check the official SHIB X (Twitter) feed. Blockchain explorers like Etherscan also show burn wallet data.

By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#).

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using
Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment
methods and 0 transaction fees.

I have crypto assets

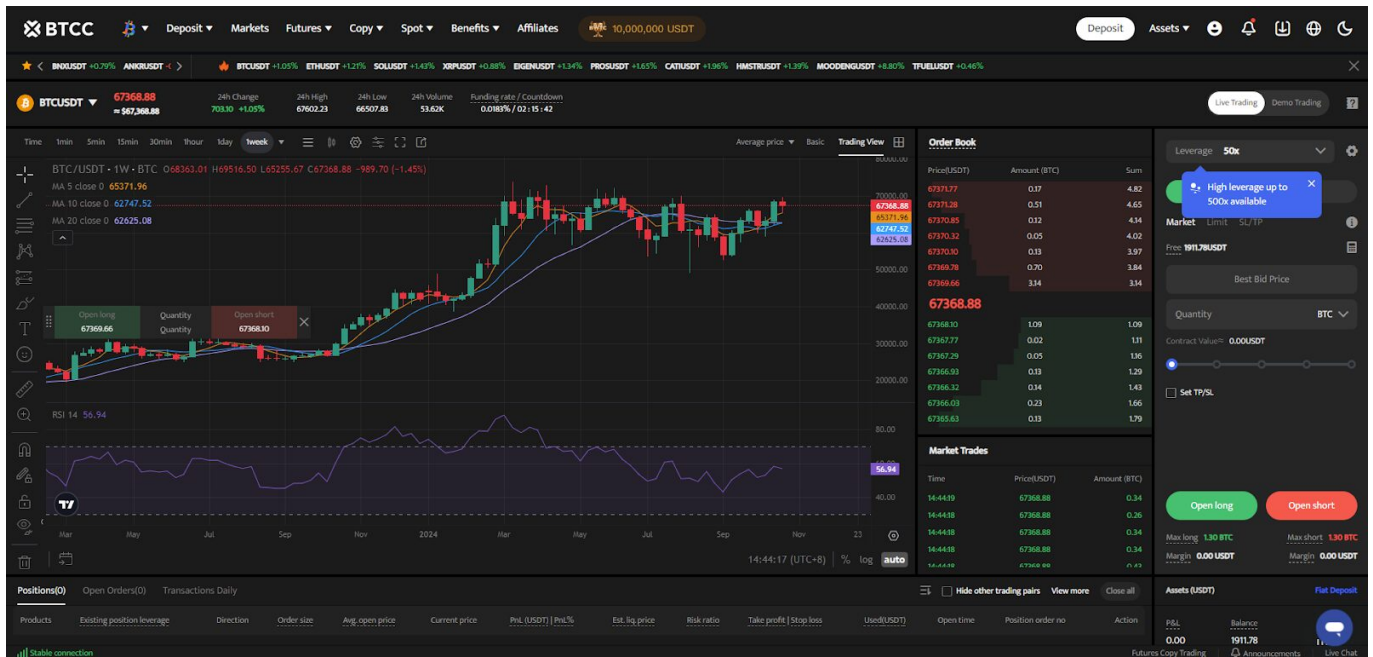

Crypto Deposit

Get the deposit address for BTC, ETH, or any
other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform’s infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange’s website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
